

CHRISTIAN COALITION OF AMERICA THANKS SENATOR LINDSEY GRAHAM

FOR HAVING THE COURAGE AND WISDOM TO LEAD AMERICA
ON THE PATH TOWARD A SECURE ENERGY FUTURE

America spent more than \$440 billion on foreign oil last year. We are now more dependent on overseas energy sources than at any time in our nation's history. Some of our money even goes to fund enemies who want to destroy us.

Let's not forget paying \$4 a gallon for gas. America has been held hostage by foreign cartels for far too long.

Senator Graham is putting America first by leading us to expand "Made in America" energy resources, such as:

- Responsible off-shore drilling
- Hydrogen power (Currently being developed at the University of South Carolina)
- Nuclear Power
- Solar and Wind (Wind turbines are already being built in upstate South Carolina)

All of these resources need to be part of a comprehensive plan to get America on the path to energy independence.

In South Carolina, the number of clean energy jobs grew by 36% over the past decade to over 11,000 jobs in the state today.

Christian Coalition of
America

I would like to ask you to call Senator Graham and encourage him to keep fighting for our families by making our country safer and by creating jobs with a "Made in America" energy plan.

Roberta Combs, President
Christian Coalition of America
